Professional Summary

Full Stack Software Engineer focused on Software Architecture and Cloud. Experienced across the full development lifecycle, building modern web interfaces (React/Next.js) and low-latency backend services (Node.js/TypeScript) using Clean Architecture and DDD. Specialist in cloud infrastructure (AWS, Terraform) and CI/CD, prioritizing scalable, maintainable, and cost-effective solutions for high-traffic environments.

Core Technical Skills

- **Languages & Technologies:** TypeScript, Node.js, React.js, Next.js, Rust, Python, Java, C/C++, Shell script, Tailwind CSS.
- **Architecture & Cloud:** AWS, Terraform, Clean Architecture, DDD, Microservices, CI/CD, GitHub Actions.
- **Databases & Infra:** DynamoDB, SQL, PostgreSQL, Docker, Linux.

Professional Experience

Hotmart | Belo Horizonte, MG, Brazil (Hybrid) | Jul 2026 – Present *Software Engineer I*

- High-traffic web development (React/Next.js) and backend for lead generation and GMV.
- Engineering low-latency Node.js APIs applying Clean Architecture and DDD.
- DynamoDB data modeling supporting unpredictable campaign traffic spikes and CRM integrations.
- Cloud infrastructure management via Terraform and CI/CD pipeline automation with GitHub Actions.

***Software Engineer Intern* | Oct 2025 – Jul 2026**

- Implementation of Node microservices, AWS resources (Terraform), and front-end using Next.js.

Education

PUC Minas | Bachelor's Degree in Software Engineering | Feb 2024 – Dec 2027

Featured Projects and Achievements

- **High-Performance Constrained Projects:** Development of cloud architectures (PUCMaps) and systems in Rust (Styx) optimized to operate within strict hardware and budget constraints (AWS Free Tier).
- **Competitions:** 1st place in the Minas Gerais Programming Marathon (Greater BH, Team depende.sh).

Languages

- Advanced English (C1)
